

Physics Vocabulary Crossword:

Name: _____ Period: _____ Date: _____

Print legibly. Entries that cannot be read or are misspelled will not score points.

ACROSS

- 2. Der lieber Gott Wiirfelt nicht
- 6. rate of change of position
- 9. what results when we have 20 across
- 11. unit of force
- 12. falling in a circular path (2 words)
- 13. trig function
- 14. fundamental property of matter
- 16. a thousand meters
- 19. result of gravity
- 20. that which opposes motion
- 23. a billion coulombs
- 24. cause of 26 across
- 26. rate of change of speed
- 27. where is it?
- 30. unit of pressure
- 32. energy of motion
- 33. fruit w/ positive electrons and negative protons
- 34. motion with a sense of direction
- 35. extent of surface
- 36. moving mass has ?

DOWN

- 1. unit of 22 down
- 2. what work produces
- 3. a very long time interval
- 4. what physics is
- 5. ? elements have loose valence electrons
- 6. at rest
- 7. in motion
- 8. smallest pieces of an element
- 10. that which connects two points
- 15. Einstein unified this with time
- 17. if it doesn't have wheels it will ?
- 18. logical conjunction for "not and not"
- 21. physics at great speeds
- 22. we never have enough of it
- 25. force toward a central point
- 27. stored energy
- 28. universal force
- 29. parochial unit of distance
- 31. founder of experimental physics
- 34. has magnitude and direction

Physics Vocabulary Crossword Answer Key:

ACROSS

2. Der lieber Gott Wiirfelt nicht
6. rate of change of position
9. what results when we have 20 across
11. unit of force
12. falling in a circular path (2 words)
13. trig function
14. fundamental property of matter
16. a thousand meters
19. result of gravity
20. that which opposes motion
23. a billion coulombs
24. cause of 26 across
26. rate of change of speed
27. where is it?
30. unit of pressure
32. energy of motion
33. fruit with positive electrons and negative protons
34. motion with a sense of direction
35. extent of surface
36. moving mass has ?

ANSWER

- Einstein
- speed
- rest
- newton
- in-orbit
- tan
- mass
- km
- fall
- friction
- GC
- force
- acceleration
- position
- bar
- kinetic
- antiapple
- velocity
- area
- momentum

DOWN

1. unit of 22 down
 2. what work produces
 3. a very long time interval
 4. what physics is
 5. ? elements have loose valence electrons
 6. at rest
 7. in motion
 8. smallest pieces of an element
 10. that which connects two points
 15. Einstein unified this with time
 17. if it doesn't have wheels it will ?
 18. logical conjunction for "not and not"
 21. physics at great speeds
 22. we never have enough of it
 25. force toward a central point
 27. stored energy
 28. universal force
 29. parochial unit of distance
 31. founder of experimental physics
 34. has magnitude and direction
- sec
 - energy
 - eon
 - fun
 - metallic
 - static
 - dynamic
 - atoms
 - line
 - space
 - slide
 - nor
 - relativity
 - time
 - centripetal
 - potential
 - gravity
 - mile
 - Galileo
 - vector
